Health Information portal for COVID-19

Hanna Tolonen

Finnish institute for health and welfare

Health information portal for COVID-19

- To build the Health Information Portal on health and health care data for COVID-19 to support structured information exchange between EU countries.

- Would cover not only data sources on patients but more broadly on population level as well.

Finnish institute for health and welfare

healthinformationportal.eu

One-stop-shop for health information

Portal will include

Catalogue of national nodes

Catalogue of research networks

Catalogue of existing training materials and courses

Catalogue of COVID-19 data sources incl. also population health studies

Legal and ethical toolbox

National nodes

- National node = A network of national stakeholders working with the health information and being owners/controllers of health and health care data

- Portal will have a catalogue of national nodes describing
  - Included institutions and experts
  - Health information sources
  - Dissemination materials on health information
  - Involvement in different national projects
  - Involvement in different international projects and networks

Research networks

- Existing health domain specific research networks
- Provides information on
  - Included institutions and relevant international organizations
  - Experts
  - Tools and publications
    - Results of the project
    - Repository of documents
    - Tools, data and information
    - Legislation (if relevant)
    - Guidelines
    - Dissemination materials (presentations, videos, infographics etc.)
  - COVID-19 related activities
  - Events and news

Data catalogue

- In the first phase focused on Covid-19 related data sources but in a long-run covering population based health information in general

- Metadata catalogue of the existing population health data sources in EU countries

- Includes also population health studies e.g. health surveys, longitudinal studies and intervention studies but not clinical trials or surveillance systems

Finnish institute for health and welfare

Capacity building

- A catalogue of existing COVID-19 related training activities, later on, other health information related training activities will be added

- Promotion of training activities such as webinars organized by PHIRI and other relevant institutions/networks

- Collection of available training materials and other supporting documents such as guidelines and online tools related to the collection and use of health information
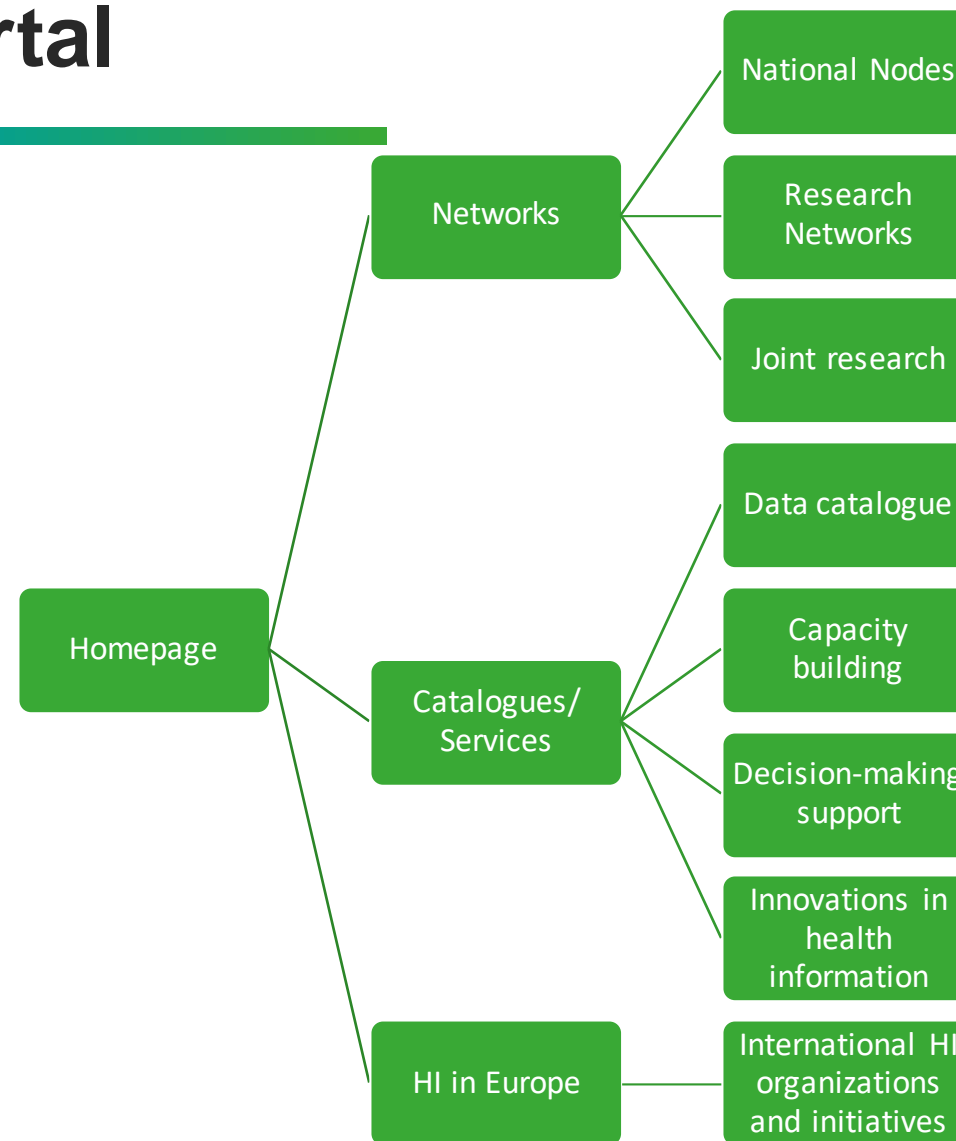

Legal and ethical issues

- A toolbox for legal and ethical guidelines
  - A review of the existing practices and guidelines on ethical and legal aspects of performing and exchanging health information on COVID-19
  - Guidelines for deployment, utilisation and governance of the health information portal on health and health care data information exchange
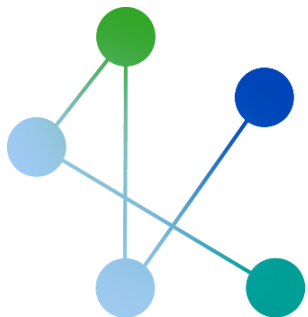

Other materials on the portal

- A special section for COVID-19
  - Includes for example Rapid Exchange Forum
- Search functions
- Special section for Media

Development of the portal is an iterative process where feedback from users is essential

Networks
- National Nodes
- Research Networks
- Joint research

Homepage

Catalogues/ Services
- Data catalogue
- Capacity building
- Decision-making support
- Innovations in health information

HI in Europe
- International HI organizations and initiatives

Role of National Nodes
